

Day 21: Laundry Room

Laundry Rooms can become catchall rooms for everything that walks in the door. But these "work rooms" don't have to be the forgotten room, they can be as clean and organized as the rest of our house. Making them a pleasure to "work" in.

Checklist

Objective: To increase efficiency by organizing and utilizing every square foot of the laundry room.

- Clear the room of all products and sort, discarding any expired items.
- Create a Put Away Box and immediately return items that don't belong in the laundry room to their home.
- Sort products in the laundry room by use and contain them in baskets, bins or containers.
- Install functional storage; shelves, racks, ironing board, dirty laundry bins and so on.
- Clean and sanitize all surfaces in the room, including the washing machine and dryer.
- Hide supplies as much as possible to rid the room of messy clutter. Keep out only the products you need for laundry.
- Create small bins and stock necessary supplies for the following kits: minor sewing repair and stain removal.
- Put something pretty in the room that motivates and inspires.

Tomorrow: Laundry Supplies
